

SAFE-HIT[®] CHANNELISERS

➤ Safe-Hit Surface Mount Channelisers are ideal for marking temporary work zone applications. The posts are designed to prevent cracking, peeling, discolouring, rotting and corroding. The Safe-Hit surface mount bases are easily installed on tar or concrete with epoxy, butyl pad or bituminous adhesive. The twist lock feature allows for post replacement in less than 10 seconds. Heavy-duty Duraposts are available for use in areas where multiple impacts are anticipated.
